

Piri Reis Vocational and
Technical High School

LET'S DISCOVER GEOGRAPHY AND CULTURE OF OUR COUNTRIES

Introduction of the country, city, school and gastronomy to another secondary school/schools (preferably with the same interest in gastronomy).

Plan is to have monthly online presentation between schools via videocall or having online chatting lessons where students could be in touch via messenger or some other tool where they could write in English to find out more about each other. If this is not possible we would like our students to be in touch with the other school independently in their free time.

Brief information overview:

October - country

November - city

December - school

January, February - gastronomy of the country

March - creation of the final presentation and paperwork
